

JEAN-PIERRE ROBERT

A seasoned administrator, Jean-Pierre Robert is an internationally recognised ambassador of medical innovations and a well-known leader in the pharmaceutical and medical device fields. Whether in the United States, Europe, China, Japan, India, etc., Jean-Pierre Robert meets with people from diverse cultures whose medical challenges rapidly become business opportunities to promote innovative solutions that have a major impact on developments in the areas of medical diagnosis and patient care.

Whether he is involved in marketing software that facilitates and accelerates decision-making or monitoring cases of severe illness such as cancer, this chemist by trade continues to promote R&D and to manage state-of-the-art portfolios for the future.

Mr. Jean-Pierre Robert has held several positions, including the vice-presidency and general direction of Tyco Healthcare/ Mallinckrodt (now Covidien) from 1996 to 2003 as well as the general direction of Draxis from 2005 to 2010. From 2010

until 2016, he has taken the roles of CEO and chairman of the Board of Directors at Cadens Medical Imaging (now Imagia Cybernetics). Since 2016, he became president of the campus of medical technologies (CTS), an accelerator offering a unique value proposition for the start-up with a professional framework that allows them to raise the market dynamics and to receive international visibility.

Having completed part of his MBA at HEC Montréal and his Bachelor's degree in chemistry at the Université de Montréal, Jean-Pierre Robert has distinguished himself as a generator of ideas and innovative concepts.

A seasoned negotiator in company mergers and acquisitions, Mr. Robert has the innate ability to bring together the ideal candidates whose talents are essential for project success. Always surrounded by talent, his teams have received numerous recognition awards, among them the Award of Excellence in Innovation from the National Research Council

“Bringing together skilled and passionate people around a shared objective allows one to fully understand the mounting issues in the health field and to achieve results that make a huge difference in the lives of others,” points out Mr. Robert.

of Canada. Endowed with good listening skills and a clear view of possible solutions, he has participated in several economic missions, organised by the federal and provincial governments, to India, Japan and China. During these missions abroad, Jean-Pierre Robert has successfully made his mark and paved the way for numerous commercial and strategic agreements.

Jean-Pierre Robert is also actively involved as Senior Business Advisor with Inno-centre, an organization specializing in consulting services for innovative SME's in Canada and in several business networks and sits on several well-known boards of directors.
